DETAILED ACTION

Double Patenting

Applicant is advised that should claim 8 be found allowable, claim 10 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 3, and 5 are rejected under 35 U.S.C. 102(a) as being anticipated by Endo et al. (Japanese Patent No. 2003310339).

Endo et al. disclose a flat straightener comprising an ion generator system 11, a fan 9, and a motor 10.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 3732

Claims 1, 2, and 4-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Doyle (United Sates Patent No. 4,520,256) in view of Nakagawa et al. (United Sates Patent Publication No. 2002/0189128).

Doyle discloses the invention essentially as claimed except for the ion generator system. Nakagawa et al. disclose a hair styling appliance having an ion generator system 62. The ion generator system comprises an anode pin and a cathode ring. The device further includes an indicator LED 9 for the ion generator. It would have been obvious to one skilled in the art to provide the curling iron of Doyle with an ion generator system in view of Nakagawa et al. in order to treat the hair and make it smooth and silky.

Claims 1, 3, -6, and 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yuen et al. (United Sates Patent Publication No. 2005/0076930) in view of Nakagawa et al. (United Sates Patent Publication No. 2002/0189128).

Yuan et al. disclose the invention essentially as claimed except for the ion generator system. Nakagawa et al. disclose a hair styling appliance having an ion generator system 62. The ion generator system comprises an anode pin and a cathode ring. The device further includes an indicator LED 9 for the ion generator. It would have been obvious to one skilled in the art to provide the flat straightener of Yuan et al. with an ion generator system in view of Nakagawa et al. in order to treat the hair and make it smooth and silky.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Todd E. Manahan whose telephone number is 571 272- 4713. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Shaver can be reached on 571 272-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
